Department of Pathology
Baylor College of Medicine

Dear Dr. Cagle:

Please update me on the status of your Moran Foundation project (1-89-0037) entitled "The Influence of Corticosteroids on Pulmonary Adenocarcinoma".

Since approval and funding is generally for a one-year period, all projects approved in or prior to June 1991 should now be "complete", or nearly so.

I need a progress and/or final report regarding your project, including dates and times of any presentations, and information regarding any publications.

Please submit this to me within the next 30 days.

Sincerely yours,

Philip J. Migliore, M.D.
Research Director

PJM/ms

Dear Dr. Migliore:

My Moran Foundation Project (1-89-0037) entitled "The Influence of Estrogen on Pulmonary Carcinomas" has been completed. The results show that 7 of 20 non-small cell lung cancers have elevated corticosteroid receptor levels. The writing of a manuscript with these results is now in progress. These results will be submitted for presentation at the World Congress on Lung Disease in Amsterdam, The Netherlands, in June 1993. The Moran Foundation will be acknowledged in all presentations and manuscripts.

Thank you for your generous support.

Sincerely,

Philip Cagle, MD

Philip T. Cagle, M.D.
Assistant Professor of Pathology
